

2008 Annual Report to the Illinois General Assembly on Insurance Cost Containment

Rod R. Blagojevich, Governor

Dean Martinez, Secretary
Michael T. McRaith, Director of Insurance

April 15, 2008

To the Honorable Members of the 97th General Assembly:

The Illinois Insurance Cost Containment Act requires the Director of Insurance to submit an annual report to the General Assembly by April 15th containing an analysis of portions of the Illinois insurance market and a recommendation of the most appropriate and comprehensive cost containment system for the state (Article XLII, 215 ILCS 5/1202d).

In accordance with the requirement of Section 1202 of the Illinois Insurance Code, I am pleased to submit the Annual Report to the General Assembly on Insurance Cost Containment for 2008. It contains significant information from a national and Illinois perspective regarding the underwriting results for the property and casualty insurance industry for the year 2006.

Sincerely,

Michael T. McRaith
Director of Insurance

PURPOSE OF THIS REPORT

The Division of Insurance is required by statute to submit an Annual Report to the Illinois General Assembly on Insurance Cost Containment by April 15th of each year containing an analysis of sections of the Illinois insurance market and a recommendation of the most appropriate and comprehensive cost containment system for the state.

The law was enacted in 1986 in response to the public's growing concern about the availability and affordability of property and liability insurance. The law mandated that a uniform system be created for the collection, analysis and distribution of insurance cost data. Its expressed intent was to permit and encourage competition among companies on a sound financial basis to the fullest extent possible and to establish a mechanism to ensure the provision of adequate insurance at reasonable rates to the citizens of Illinois.

DIRECT PREMIUMS WRITTEN AND LOSS RATIOS BY STATE

Figure 1 shows a breakdown of total direct written premium (DWP) and losses incurred for the property/casualty industry by state from 2002 through 2006.

Direct written premium in Illinois totaled \$21.2 billion in 2006, representing 4.2 percent of total written premium nationwide. Property/casualty losses in Illinois were 56.3 percent of direct earned premium in 2006. The loss ratio in Illinois has decreased each year over the past five years.

* Direct Pure Loss Ratio is calculated by dividing losses incurred by direct earned premium.

**Source: 2003 to 2006 data: NAIC State Data Network; aggregate Schedule T for all property/casualty insurers.

Data for 2002 is from Best's Aggregates & Averages-Property/Casualty, United States and Canada, Supplement, 2002 Edition

Figure 2 shows the percentages of total direct written premiums and loss ratios for the property/casualty industry for ten regions of the United States during 2006.

Figure 2
Distribution of Direct Premiums Written and Loss Ratios by Region

	Pacific	Mountain	Northwest Central	Southwest Central	Northeast Central	Southeast Central	Mid-Atlantic	South Atlantic	New England	Other*	Total All Regions
Percent Total 2006 DPW	16.2%	6.4%	6.5%	10.5%	13.2%	5.0%	14.7%	19.5%	5.2%	2.9%	100.0%
Direct Loss Ratio – 2006	47.6%	52.1%	58.4%	50.1%	57.8%	56.3%	53.9%	49.6%	48.1%	42.1%	51.8%
Direct Loss Ratio–5 Yr Avg.	56.8%	57.2%	58.7%	73.5%	62.9%	74.7%	61.3%	64.2%	55.2%	47.0%	62.1%

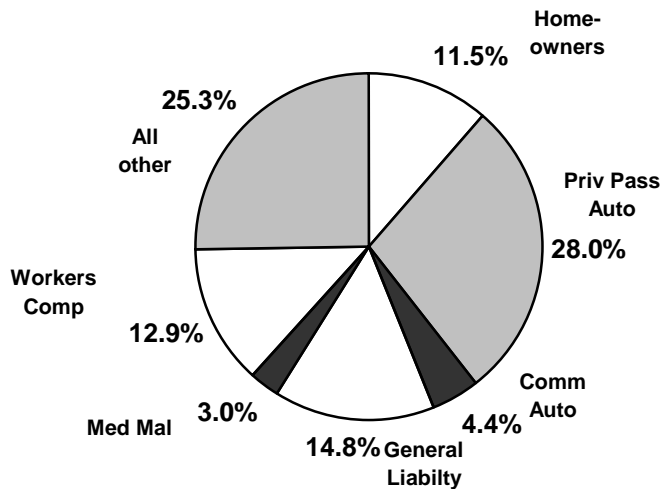

*The "other" region includes American Samoa and Guam, Puerto Rico and the U.S. Virgin Islands and Canada.

The Southwest Central and Southeast Central regions both experienced loss ratios above 100 percent during 2005 as a result of both Hurricanes Katrina and Rita. In contrast, in 2006 no hurricanes or tropical systems made landfall on either the Atlantic or Gulf coasts of the United States.

Figure 3 illustrates the distribution of property/casualty premium written by line of business during 2006 in Illinois. As the chart shows, personal-lines insurance (homeowners and private passenger automobile) makes up the largest portion of the property/casualty market. Private passenger automobile (28.0 percent), including both the liability and physical damage component, is the single largest line of business.

Pursuant to Illinois Administrative Code Title 50, Chapter I, Subchapter vv, Part 4203, companies are required to file data for private passenger automobile (liability and physical damage separately), homeowners (including residential fire), commercial automobile liability, and specified insurance classes from the medical malpractice and other liability lines. In this year's supplemental report, the workers compensation line of business has also been included as a separate line.

ANALYSIS OF THE MARKETPLACE

From both a consumer's and a regulator's standpoint, insurance regulation should provide an environment where:

- Coverage is available.
- Coverage is offered at a reasonable price.
- Coverage is available from reliable insurers.

The Cost Containment Act requires the Division to analyze the property and casualty marketplace each year and to recommend changes that may be needed to correct market problems.

The Division measures the overall competition of the Illinois marketplace by looking at three elements: availability, profitability, and reliability.

Availability

The Division measures availability in three ways:

1. Herfindahl/Hirschman Index (HHI) and Market Shares by Line.
2. Market Shares of Residual Market Mechanisms.
3. Participation in Alternative Risk Transfer Mechanisms.

Herfindahl/Hirschmann Index (HHI) and Market Shares by Line

The Cost Containment Act requires the Division to collect and analyze data in five major lines of business: homeowners, private passenger automobile, commercial automobile liability, medical malpractice, and other liability. This report contains a comparison of underwriting results for Illinois versus nationwide for these five lines of business and an analysis of market concentration and market share in the State of Illinois. Market concentration is determined using an economic measure known as the Herfindahl/Hirschmann Index (HHI). The HHI is the summation of the squares of each company's market share. Generally, an HHI of 1800 or above is an indication that the market may be too highly concentrated and may be approaching anti-competitive behavior.

Homeowners HHI

Figure 4 provides a graph of the HHI for Illinois homeowners insurance from 2002 through 2006. As the chart shows, the market for homeowners insurance became more concentrated during 2006 than during the previous four years. However, the market concentration remains well within acceptable levels.

Figure 4

Illinois Market Concentration - Homeowners (2002-2006)

The top ten Illinois homeowners writers (including residential fire) and their market shares for 2006 and 2005 are shown in Figures 5 and 6.

*Losses incurred, defense and cost containment expenses incurred and taxes, licenses and fees are shown as a percent of earned premium. Commission and brokerage expenses are shown as a percent of written premium.

The top ten Illinois homeowners writers (including residential fire) and their market shares for 2006 are:

State Farm Fire and Casualty Co	32.0%
Allstate Indemnity Co	9.1%
Country Mutual Insurance Co	7.3%
Allstate Insurance Co	6.9%
Illinois Farmers Insurance Co	6.0%
American Family Mutual Insurance Co	5.6%
Liberty Mutual Fire Insurance Co	1.5%
Economy Premier Assurance Co	1.5%
Travelers Prop Casualty Insurance Co	1.4%
Travelers Personal Insurance Co	1.3%
Percent of Total Market	72.6%

Homeowners' data are collected pursuant to Cost Containment Data and Reporting Requirements (Part 4203, subpart A). Again this year, cost containment data for homeowners are summarized for the entire State of Illinois, the City of Chicago, and downstate Illinois. State Farm Fire & Casualty Company continues to rank first in all three categories. Most insurers that write in downstate Illinois also have a presence in the City of Chicago. There were 159 insurers reporting homeowners business throughout the state and 155 companies reporting direct written premium in the City of Chicago. This business represents homeowners multi-peril coverage written in HO-1, HO-2, HO-3, HO-5 and HO-8 policies.

On a statewide basis Country Mutual Insurance Company ranked first in residential fire insurance followed by Farmers Automobile Insurance Association, Merrimack Mutual Fire Insurance Company and Mount Carroll Mutual Fire Insurance Company. There were 104 other companies also writing this coverage in Illinois.

State Farm Fire & Casualty Company wrote the largest amount of mobile home coverage followed by Progressive Casualty Insurance Company, Country Mutual Insurance Company, American Family Mutual Insurance Company, Pekin Insurance Company and Auto-Owners Insurance Company.

The top ten writers in the entire State of Illinois homeowners market are:

- State Farm Fire and Casualty Co
- Allstate Indemnity Co
- Country Mutual Insurance Co
- Allstate Insurance Co
- Illinois Farmers Insurance Co
- American Family Mutual Insurance Co
- Liberty Mutual Fire Insurance Co
- Economy Premier Assurance Co

The top ten Illinois commercial automobile liability writers for 2006 are:

Transguard Insurance Co of America Inc	8.5%
American Service Insurance Co Inc	6.1%
Cincinnati Insurance Co	5.1%
Lincoln General Insurance Co	4.6%
Northland Insurance Co	4.3%
Progressive Premier Insurance Co of IL	3.9%
American Country Insurance Co	3.7%
Occidental Fire & Casualty Co of NC	3.1%
West Bend Mutual Insurance Co	3.0%
Canal Insurance Co	2.7%
Percent of Total Market	44.8%

Pursuant to Cost Containment Data and Reporting Requirements (Part 4203), data are collected for specified classes of commercial automobile liability insurance through the Cost Containment filings. Two groups of particular interest are: taxis and public livery and other (excluding taxis and public livery).

Two insurers, American Service Insurance Company and American Country Insurance Company, exhibit a large share of the taxis and public livery class of commercial automobile liability insurance. Fifty other companies compete for the remaining market share in this class, the same number as reported in 2005. The Division carefully monitors this market because of the above-mentioned companies' significant market share in this class. American Country Insurance Company insures the two largest taxicab firms in Chicago and the State of Illinois.

The top five admitted writers in this market are:

American Service Ins Co Inc	40.9%
American Country Ins Co	33.8%
Lancer Ins Co	5.8%
Sentry Select Ins Co	5.5%
Allied Prop & Casualty Ins Co	3.7%

The other classes of commercial automobile liability insurance collected represent the fleet and non-fleet combined trucks, tractors, and trailers classes in this line. These classes remain very competitive in Illinois. A total of 231 companies reported positive written premium in 2006, with 73 companies writing in excess of \$1 million in premium. The surplus line market wrote 148 policies and \$2,806,305 in premium for this coverage. This represents an increase of 71 policies and \$650 thousand in premium over 2005.

The top writers in this market are:

Transguard Ins Co of America Inc	9.5%
Cincinnati Ins Co	5.7%
Lincoln General Ins Co	5.2%
Northland Ins Co	4.6%
Progressive Premier Ins Co of IL	4.3%
Occidental Fire & Casualty Co of NC	3.4%
West Bend Mutual Ins Co	3.4%
Canal Ins Co	3.0%
Great West Casualty Co	2.9%
Acuity A Mutual Ins Co	2.8%

Medical Malpractice HHI

Figure 13 provides a graph of the HHI for Illinois medical malpractice coverage from 2002 through 2006. As is the case for most other states, the largest writer in Illinois of medical malpractice coverage is a physician-affiliated exchange. In Illinois, that provider is the ISMIE Mutual Insurance Company, which wrote 63.3 percent of the medical malpractice coverage in 2006. The second largest medical malpractice insurer, by direct written premium, was American Physicians Assurance Corp., which wrote only 8.0 percent of the business. As the chart shows, the market continues to be highly concentrated, with an HHI well above the 1800 level.

Figure 13 Illinois Market Concentration - Medical Malpractice (2002-2006)

Figures 14 and 15 show the top ten Illinois medical malpractice writers and their market shares for 2006 and 2005.

Figure 14 Top 10 Medical Malpractice Insurers in Illinois – 2006

Company	Direct Written Premium (000's omitted)	Direct Earned Premium (000's omitted)	Illinois Market Share	Losses Incurred	Direct Defense & Cost Cont. Exp. Incurred	Comm. & Brokerage Expenses	Taxes, Licenses & Fees

Physicians Ins Co of WI	6,084	6,171	1.0%	93.8%	78.5%	11.5%	0.8%
Cincinnati Ins Co	5,415	5,626	0.9%	28.1%	-77.2%	15.5%	2.1%

*Losses incurred, defense and cost containment expenses incurred and taxes, licenses and fees are shown as a percent of earned premium. Commission and brokerage expenses are shown as a percent of written premium.

In 2005, the top ten medical malpractice insurers in Illinois wrote \$562,878,919 of coverage in this state and incurred losses of \$309,543,649.

The top ten Illinois medical malpractice writers (surgical/non-surgical classes only) and their market shares for 2006 are:

ISMIE Mutual Insurance Co	72.5%
American Physicians Assurance Corp	9.3%
Medical Protective Co	3.9%
Pronational Insurance Co	3.4%
Physicians Insurance Co of WI	1.9%
Doctors Co, An Interins Exchange	1.9%
Professional Liability Ins Co of America	1.1%
Medical Alliance Insurance Co	1.1%
Chicago Insurance Co	0.8%
Cincinnati Insurance Co	0.6%
Total	93.6%

Note: The differences between the market shares shown in this table and that mentioned on the previous page is due to the fact that the market share on the previous page is based on the total medical malpractice premiums written in the Illinois, whereas the above percentages are based on the surgical/non-surgical classes only – MDs, ODs and Dentists.

In 2006 there were forty-seven admitted carriers who reported the medical malpractice classes that the Division collects, fourteen more than in 2005. In 2006 eight companies had greater than 1% of the market as opposed to six companies in 2005.

This report breaks down medical malpractice liability into four different class groups. The first two groups, medical non-surgery and physicians, surgeons and dentists—not otherwise classified, represent the majority of medical malpractice business reported. The two other covered groups are dentists and oral surgery and medical-surgery. Under 215 ILCS 5/155.18, every company writing medical malpractice insurance shall file rates and rating schedules with the Director at least annually and whenever there is a change.

The top ten writers in the medical non-surgery market are:

- ISMIE Mutual Insurance Co
- American Physicians Assurance Corp
- Medical Alliance Insurance Co
- Pronational Insurance Co
- Medical Protective Co
- Professional Liability Insurance Co of America
- Doctors Co, An Interins Exchange
- St Paul Fire & Marine Insurance Co
- Chicago Insurance Co
- St Paul Medical Liability Insurance Co

The top ten writers in the physicians, surgeons, and dentists – not otherwise classified market are:

- ISMIE Mutual Insurance Co
- American Physicians Assurance Corp
- Pronational Insurance Co
- Medical Protective Co
- Physicians Insurance Co of WI
- Doctors Co, An Interins Exchange
- Cincinnati Insurance Co
- National Union Fire Insurance Co Of Pitts
- Chicago Insurance Co
- St Paul Fire & Marine Insurance Co

The top five writers in the dentists and oral surgery market are:

- Medical Protective Co
- Continental Casualty Co
- Oms National Insurance Co Rrg
- American Insurance Co
- Firemans Fund Insurance Co

The top five writers in the medical-surgery classes market are:

ISMIE Mutual Insurance Co
 American Physicians Assurance Corp
 Medical Protective Co
 Doctors Co, An Interins Exchange
 Professional Liability Insurance Co of America

The surplus lines market accounted for \$59.5 million of medical malpractice premium within the four reported groups, which was approximately \$12 million less than was written by the surplus lines market in 2005. However, the number of policies increased by 48 to 940 policies written in 2006.

Other Liability HHI

Figure 16 provides a graph of the HHI for Illinois other liability insurance from 2002 through 2006. The figure indicates that the market for other liability insurance in Illinois continues to be very competitive.

Figure 16

**Illinois Market Concentration - Other Liability
(2002 - 2006)**

Figures 17 and 18 show the top ten Illinois other liability writers and their market shares for 2006 and 2005.

*Losses incurred, defense and cost containment expenses incurred and taxes, licenses and fees are shown as a percent of earned premium. Commission and brokerage expenses are shown as a percent of written premium.

Within the other liability line of business, the Division collects cost containment data for three main classes of coverage. These are liquor liability, lawyers' professional liability and day care liability.

The top ten insurers by market share for other liability coverage in Illinois for all three of the above-mentioned classes combined in 2006 were:

Underwriters At Lloyds London	28.4%
Continental Casualty Co	18.3%
IL State Bar Assoc Mutual Ins Co	16.2%
Chicago Insurance Co	5.0%
Executive Risk Ind Inc	2.7%
Great American Insurance Co	2.6%
American Guarantee & Liability Ins	2.2%
Illinois Casualty Co (A Mutual Co)	1.8%
St Paul Fire & Marine Insurance Co	1.5%
Springfield Fire & Casualty Co	1.5%
Percent of Total Market	80.3%

The following separates the top insurers by market share for the individual classes identified above. Additionally, home daycare liability, which is reported separately under the homeowner's line of business is included.

In 2006 thirteen companies wrote more than \$1 million in premium in the liquor liability market. In 2005, six companies reported premium in excess of \$1 million. In 2006, the surplus lines market wrote 32 liquor liability insurance policies. The average premium for these 32 policies was approximately \$6,000, a decrease from the 2005 average by about \$2,800.

The top 5 writers in the liquor liability market are:

- Underwriters At Lloyds London
- Continental Casualty Co
- IL State Bar Associates Mutual Insurance Co
- Chicago Insurance Co
- Executive Risk Ind Inc

In 2006, Continental Casualty Company was the top writer of lawyers' professional liability insurance, writing in excess of \$21.7 million of direct written premium. The Underwriters at Lloyds London wrote approximately \$20.8 million and Illinois State Bar Association followed with premium in excess of \$16.4 million. The next seven companies each wrote in excess of \$1 million in premium. In 2006, the surplus lines market wrote 152 policies and \$11,031,596 in premium, representing an increase of 25 policies and just over \$ 4 million in premium from 2005. The lawyers' professional liability market is dominated by a few companies and is one of the markets watched closely by the Division.

The top 10 writers of lawyers' professional liability insurance are:

Continental Casualty Co
Underwriters At Lloyds London
IL State Bar Associates Mutual Insurance Co
Chicago Insurance Co
American Guarantee & Liability Insurance
Executive Risk Ind Inc
Great American Insurance Co
General Star National Insurance Co
St Paul Fire & Marine Insurance Co
Medmarc Casualty Insurance Co

In 2006, forty-seven admitted insurers reported daycare liability data for Illinois. This is one less than in 2005. The surplus lines market wrote 397 policies and \$934,653 in daycare liability premium during 2006. This was a decrease of 40 policies from 2005 and \$ 696,391 less in premium.

The top five admitted writers of daycare liability insurance are:

West Bend Mutual Insurance Co
Riverport Insurance Co
Cincinnati Insurance Co
Church Mutual Insurance Co
Stonington Insurance Co

In 2006, sixteen insurers reported data for the home daycare class of business in Illinois. The top five insurers writing this class of business are:

State Farm Fire and Casualty Co
Country Mutual Insurance Co
Allstate Indemnity Co
Allstate Insurance Co
First National Insurance Co of America

Market Shares of Residual Market Mechanisms

States establish residual market mechanisms to provide coverage for consumers who are unable to buy coverage in the voluntary market. If a marketplace does not function well there will be an inordinate number of consumers in residual market programs. This is because insurers will tighten their underwriting standards, charge prices that are higher than what consumers can get in the residual market program, or stop writing business altogether in states where market problems persist.

Illinois residual market mechanisms provide essential insurance coverage for the hard-to-place risk, at rate levels approved by the Division. Illinois has residual market mechanisms for three lines of insurance: property, automobile, and workers' compensation.

Property - The Illinois FAIR Plan Association (FAIR Plan)

Fire and homeowners insurance are placed directly through the FAIR Plan. Both personal and commercial insurance is available. Insurance companies share in the FAIR Plan's profits and losses in proportion to their voluntary market shares.

In Illinois, property insurance is widely available in the voluntary marketplace and only a very small percentage of consumers obtained coverage through the FAIR Plan. In addition, Illinois consumers are not at a coverage disadvantage when they buy insurance from the FAIR Plan, as is the case in many other states. In other states, property residual market programs offer only dwelling fire or basic homeowners policies. Illinois has one of the most progressive FAIR Plans in the nation. Through the FAIR Plan, Illinois consumers can buy virtually the same coverages that are available in the voluntary marketplace, including guaranteed replacement cost, sewer back-up, earthquake, and building ordinance and law endorsements.

Figure 19 shows the total amount of dwelling and homeowners premium written by the FAIR Plan as well as a percentage of all dwelling and homeowners premium written in Illinois from 2002 through 2006.

Figure 19 Written Premiums for Illinois FAIR Plan (2002-2006)

	Amount of Written Premiums	As % of Total Written Premiums
2002	\$7,104,000	0.20%
2003	\$9,800,000	0.49%
2004	\$11,030,119	0.52%
2005	\$9,073,367	0.41%
2006	\$7,018,505	0.31%

*Source: Premium amounts provided by Illinois FAIR Plan

Automobile - The Illinois Automobile Insurance Plan (Auto Plan)

Private passenger automobile risks are assigned to private passenger automobile insurers on a rotational basis in proportion to their voluntary market shares. Assignments stay with the company and are not shared with other writers.

Commercial automobile risks are placed through servicing companies. Losses are divided among the voluntary writers of commercial automobile insurance in proportion to their share of the voluntary business.

Figure 20 shows the 2002 through 2006 market shares for the Illinois Automobile Insurance Plan compared to nationwide data. The percent of written car-years is derived by dividing the number of written car-years insured through the residual market by the total number of written car-years insured through the voluntary market. Note that Illinois has a significantly smaller number of automobiles in the residual market than the nationwide composite.

The percent of insured automobiles in the Illinois Automobile Insurance Plan was three hundredths of a percent of the total market in 2006. This figure reinforces the fact that the voluntary auto insurance market in Illinois is extremely competitive.

Figure 20 Percent of Automobiles in Illinois Assigned Risk Plan and the United States Composite Automobile Residual Market (2002-2006)

	2002	2003	2004	2005	2006
Illinois	0.05%	0.06%	0.05%	0.04%	0.03%
Nationwide	0.52%	0.54%	1.43%	1.27%	1.21%

*Source: AIPSO Facts 2006 (based on liability car-years).

Workers' Compensation - The Illinois Workers' Compensation Assigned Risk Pool (Pool)

Several insurers act as servicing carriers for the Illinois Workers' Compensation Assigned Risk Pool. Losses are divided among the voluntary writers of workers' compensation in proportion to their shares of the voluntary business.

Figure 21 shows the percent of Illinois workers' compensation premiums written through the Pool from 2002 through 2006. The chart shows the amount of business being written in the residual market. During 2006, only 4.7 percent of Illinois direct premiums written for workers' compensation were written through the Pool.

The numbers illustrated in Figure 21 are from the NCCI and may not reconcile with numbers found in previous reports.

Figure 21 Percent of Illinois Workers' Compensation Written Through the Pool (2002-2006)

	2002	2003	2004	2005	2006
Percent of Total	8.6%	10.0%	7.8%	6.2%	4.7%

Participation in Alternative Risk Transfer Mechanisms

Traditionally, the level of participation in alternative markets indicates how well the admitted market is doing at providing coverage at prices consumers perceive to be reasonable. Therefore, if we are to assess the insurance marketplace in terms of availability, we must look at the level of activity in these alternative markets.

One problem with the non-admitted market is that there are few means by which it can be monitored. Because of the Division's limited authority over many of the alternative mechanisms, the number of risks placed and the amount of premium written cannot be assessed and a complete picture of this aspect of the insurance marketplace is not readily attainable.

- *Surplus lines* refer to insurance written by a non-admitted (unlicensed) insurer through a licensed surplus lines producer. The licensed producer must exercise due diligence in protecting the insured since the Division has no jurisdiction over unlicensed companies and the Illinois Insurance Guaranty Fund provides no protection for the consumer. Thus, it is the producer and not the Division who must determine the company's financial stability and standards of management prior to submitting the risk.

Figure 24 shows the number of policies written in Illinois from 2002 to 2006 through surplus lines producers for homeowners, private passenger auto liability and physical damage, commercial auto liability, medical malpractice and general liability coverage.

Figure 24
Surplus Lines - Number of primary and excess policies written in Illinois (2002 - 2006)

Line of Business	2002 Illinois Policy Count	2003 Illinois Policy Count	2004 Illinois Policy Count	2005 Illinois Policy Count	2006 Illinois Policy Count
Homeowners	1,181	1,340	860	535	352
PPA Liability	426	410	293	189	124
PPA Physical Damage	9,063	7,210	9,074	7,426	5,722

- *INEX (previously the Illinois Insurance Exchange)* provides a market for direct insurance and reinsurance. It is comprised of syndicates which underwrite and insure risks, and brokers who are authorized to place business with those syndicates. Fashioned after Lloyd's of London, INEX serves as a facilitator, record keeper and regulator for the operations of its members. INEX submits an annual financial statement to the Division reflecting both its combined financial position and the financial position of each individual syndicate.
- *Insurance Pools* are groups that join together for the purpose of sharing certain risks on an agreed-upon basis. Participants may consolidate their risk exposures without being subject to the same regulatory requirements as admitted insurers. Pools organized under the following Acts are allowed in Illinois:

The Workers' Compensation Act: allows entities that are members of a trade association, or that have similar risk characteristics, to form a risk-sharing pool. Each pool must submit annual financial statements, CPA audit reports, and actuarial opinions to the Division and are subject to examination by the Director.

The Religious and Charitable Risk Pooling Trust Act: permits entities having an IRS 501c (3) exemption (a non-profit entity), or hospitals owned and operated by a unit of local government, to form a trust to pool their risks. These trust funds can only operate with prior approval of the Director of Insurance. The trusts must make annual CPA audit reports to the Division and are subject to examination by the Director.

The Intergovernmental Cooperation Act: enables units of local government to enter into a pooling arrangement with other similar entities for the purpose of risk sharing. These pooling arrangements are not regulated by the Division; however, they must register with the Division and file annual audited financial statements.

- *Risk Retention and Purchasing Groups* are allowed under the Federal Liability Risk Retention Act of 1986. This Act eliminated barriers to group self-insurance programs by allowing them to buy group liability insurance. At the end of year 2006, there were 409 registered purchasing groups, 101 registered foreign risk retention groups and one registered domestic risk retention group.
- *Captive Insurance Companies* may be formed by a company to insure its own risks and exposures, by an association to insure its member organizations, or by industrial insured groups. Illinois captives are regulated by the Division, are required to file certain financial information with the Division, and are subject to examination by the Director.
- *Self-insurance* occurs when individuals or businesses retain their own risks. Entities that self-insure are under no obligation to report premiums, losses, or expenses to any statistical association or regulatory body.

Profitability

In monitoring competition in general and price performance in particular, the Division does not examine individual insurer prices for appropriateness. To do so is virtually impossible. Instead, it monitors the effectiveness of competition, examining the pattern of profits throughout the market.

In examining profitability, the Director must balance the seemingly divergent concerns of consumers and insurers. To protect consumers, rates must not be excessive. There is a fine line between rates that are excessive and rates that are inadequate, especially since insurance policies must be priced long before the results of the pricing decisions are known.

The Division must also be concerned about the long-term viability of the insurance marketplace, including the financial viability of the companies that insure consumers.

For each of the coverages listed below, this section contains Illinois-specific underwriting results compared to countrywide results:

- Combined underwriting results for business written in Illinois and business written countrywide.
- A five-year trend for Illinois losses as a percent of premiums earned, compared to the five-year trend for countrywide losses.

Homeowners

Figure 25 shows a comparison of the underwriting results of homeowners insurance written in Illinois with that written nationwide during 2006. As figure 25 shows, incurred losses in Illinois for the year were higher than the nationwide loss ratio.

Figure 25 Homeowners Underwriting Results (2006)

Homeowners (\$000 omitted)	Illinois*	Countrywide**
Direct written premiums	\$2,280,974	\$44,687,090
Direct earned premiums	\$2,245,617	\$43,382,126
<i>Expenses (% earned premium)</i>		
Incurred losses	61.7%	49.7%

**Source: NAIC State Data Network 2006 Insurance Expense Exhibit Part III, Illinois licensed insurers.

Figure 36 compares the five-year trend for loss percentages for Illinois and countrywide for other liability insurance. Losses as a percent of earned premium in Illinois in the other liability line of business remained slightly higher than losses nationwide in 2006.

Figure 36 Other Liability Losses as a % of Premiums Earned (2002-2006)

Workers' Compensation

Market trends experienced in the last several years appear to have continued in 2006. As indicated below, the overall Workers' Compensation market in Illinois experienced an increase in the incurred losses for the second straight year. Countrywide, the market has experienced a decrease during the same period.

Figure 37 shows a comparison of the underwriting results in 2006 in the workers' compensation line of business between Illinois and nationwide.

Figure 37 Workers' Compensation Underwriting Results (2006)

Workers' Compensation (\$000 omitted)	Illinois*	Countrywide**
Direct written premiums	\$2,575,532	\$35,902,875
Direct earned premiums	\$2,531,121	\$35,766,257
Expenses (% earned premium)		
Incurred losses	82.3%	59.0%
Def. & cost cont. exp. incurred	9.0%	7.8%
Comm./brokerage	6.6%	7.0%
Taxes, licenses & fees	3.0%	4.9%

*Source: NAIC State Data Network, 2006 Illinois State Page Exhibit

**Source: NAIC State Data Network 2006 Insurance Expense Exhibit Part III, Illinois licensed insurers.

Figure 38 shows workers' compensation losses as a percent of earned premium for the years 2002 through 2006. Workers' compensations losses as a percent of earned premium in Illinois have risen steadily since 2004 while the nationwide loss ratio has declined during the same period.

Figure 38 Workers' Compensation Losses as a % of Premiums Earned (2002-2006)

Reliability

In determining whether the overall marketplace is viable, the Division must consider:

- Profitability.
- Financial Solvency Regulation.

Businesses that provide a financial service must be financially sound. An insurance contract has little value to the insured if there is no guarantee that the insurance company will have the money to pay claims when needed.

As discussed earlier, the Division must balance the seemingly divergent concerns of consumers and insurers. While we must ensure that consumers are able to buy insurance at a reasonable price, we must also ensure the overall viability of the marketplace.

One measure of a company's financial performance is its profitability. It must generate enough profit to survive and succeed. In a given month, if expenses exceed income, they must be paid from the reserve fund. If the trend continues, reserve funds run out causing the business to collapse. Therefore, it is imperative that insurance companies manage income and expenses to assure profitability and survival.

A company that can offer insurance coverage at competitive prices and reap adequate profits as an ongoing concern is considered to be financially viable. When the majority of insurers in the market are competitive and profitable, the market is considered to be financially strong.

Profitability

Change in Policyholders Surplus

One measure of overall profitability is the change in policyholders' surplus from one year to the next. Policyholders' surplus is made up of: 1) underwriting gains or losses; 2) investment gains or losses; and 3) net contributed capital and other surplus changes.

Figure 39 shows the percent change in policyholders' surplus for the Illinois-licensed property/casualty industry as a whole over the past five years.

Figure 39 Percent Change in Policyholders' Surplus

*Source: NAIC State Data Network

Figure 40 shows income from investments, net income, unrealized capital gains/losses and policyholders' surplus from 2002 to 2006.

Figure 40 Net Investment Income Earned, Net Income, Unrealized Capital Gains/Losses and Policyholders' Surplus (in millions)

	2002	2003	2004	2005	2006
Net Investment gain	\$39,995	\$40,893	\$44,952	\$53,915	\$53,434
Net Income	11,485	27,199	36,488	39,675	61,230
Unrealized Capital Gains/Losses	(26,485)	30,624	17,189	4,096	28,677
Policyholders' Surplus	295,137	365,589	408,140	441,620	498,408

*Source: NAIC State Data Network

Underwriting Gains/Losses

Figure 41 shows the aggregate underwriting gain/loss for Illinois-licensed insurers from 2002-2006. The property/casualty industry experienced a healthy underwriting gain in 2006.

Figure 41 Aggregate Net Underwriting Gain (Loss) (in millions)

	2002	2003	2004	2005	2006
Premiums earned	\$290,397	\$325,159	\$344,724	\$344,913	\$359,332
Losses incurred	198,964	200,092	206,102	213,774	191,391
Loss expenses incurred	36,981	41,892	44,217	45,351	42,950
Other underwriting expenses incurred	79,362	85,604	88,666	90,570	96,724
Dividends to policyholders	<u>1,121</u>	<u>1,197</u>	<u>978</u>	<u>1,040</u>	<u>2,540</u>
Net underwriting gain/loss	<u>(\$26,031)</u>	<u>(\$3,626)</u>	<u>4,761</u>	<u>(5,822)</u>	<u>25,727</u>

*Source: NAIC State Data Network

Net Investment Income Ratio

One component of surplus is income derived from investments. The net investment income ratio measures income from invested assets relative to earned premiums. It is calculated by dividing net investment income (income from invested assets less investment expenses and depreciation on real estate) by earned premium.

Figure 42 shows the net investment income ratio for Illinois-licensed property/casualty insurers during the most recent five-year period. This ratio shows the investment income component of overall profitability.

Figure 42 Net Investment Income Ratio (2002-2006)

*Source: NAIC State Data Network

Return on Policyholders' Surplus

Another measure of overall profitability is the return on policyholders' surplus. It is the sum of net income after dividends and taxes and unrealized capital gains divided by the average of the current year and prior year's policyholders' surplus.

Figure 43 shows the aggregate return on policyholders' surplus from 2002 through 2006 for the Illinois-licensed property/casualty industry combined.

Figure 43 Return on Policyholders' Surplus (2002-2006)

*Source: NAIC State Data Network

Financial Solvency Regulation

Although the Division cannot guarantee that Illinois-licensed insurers are profitable, we monitor the financial solvency and strength of Illinois-licensed insurers in several ways including:

1. Maintaining a staff of trained accountants and specialists who identify companies developing financial difficulties so that the Division can step in to minimize potential losses to Illinois policyholders;
2. Working closely with insurance companies with identified financial difficulties to minimize potential risk to policyholders while attempting to resolve manageable problems or determine the need for rehabilitation or liquidation;
3. Employing field examiners for on-site evaluation of insurance company financial records;
4. Reviewing operations and compliance issues through scheduled, targeted, and special exams of known or suspected problems;
5. Maintaining a staff of actuaries who monitor the adequacy of loss reserves, cash flow testing, and proper valuation of assets;
6. Licensing and registering the many types of insurers, surplus lines producers, and risk sharing pools authorized by the Illinois Insurance Code and related Acts; and
7. Investigating unauthorized organizations or individuals thought to be conducting illegal insurance operations and taking regulatory action to remove them from the market to protect consumers from fraudulent activities.

SUMMARY AND RECOMMENDATION

HOMEOWNERS:

Possibly due to significant weather conditions throughout the year and in numerous locations within Illinois the favorable trends of recent years were not generally repeated in 2006 for the homeowners market. Total losses within Illinois increased from \$1,002,776,640 in 2005 to \$1,386,511,631 in 2006. Premiums remained relatively flat, resulting in an increase in the overall loss ratio from 45% in 2005 to 61% in 2006. Market concentration indicators however continue to reflect a healthy competitive market.

PRIVATE PASSENGER AUTO:

Overall, the private passenger automobile market appears to be maintaining the stability of the past several years. The average company loss ratio has continued to remain stable at 57% for each of the last three years. Additionally, market indicators continue to reflect a healthy competitive market.

MEDICAL MALPRACTICE LIABILITY:

In the first years of this decade, trends in the medical malpractice market may have negatively impacted the quality and availability of healthcare in Illinois. Problems in the medical malpractice market were caused by a variety of factors. Market indications reflect encouraging signs that this trend may be reversing. The overall average loss ratio of 84% in 2005 was reduced to 40% in 2006. Additionally, company data indicates a possible increase in competition within the market.

WORKERS' COMPENSATION:

The Division continues to monitor conflicting indicators within the workers' compensation market. The percent of workers' compensation coverage written through the National Council on Compensation Insurance pool has decreased every year since 2003. A total of 9,066 policies were moved from the pool to the open market in 2006, an increase of 881 over 2005. However, the amount of premium credit represented by 9,066 policies decreased by \$20,301,243. The general conclusion is that coverage written through the pool consisted of fewer but larger policies. Losses within the workers' compensation market continued to increase resulting in a loss ratio of 77% in 2006.

SURPLUS LINES:

The surplus lines market in Illinois experienced a dramatic increase from 2002 through 2005. In 2002 this market wrote just over \$511 million in premium and in 2005 the surplus lines market wrote in excess of \$1.016 billion in premium. For the first time in several years the market reported reductions in written premium for all lines in 2006. Total written premium reported by the Surplus Lines Association of Illinois in 2006 was \$96,832,135. The monitoring of the surplus lines market should continue as it appears that the decreases experienced in 2006 will not continue in 2007.

The Division will continue to strive for the optimal environment where insurance is accessible and affordable, and where the market is conducive to fair and lively competition. The Illinois property and casualty industry has proven flexible with market changes. External factors such as

terrorism, a significant increase in the cost of goods and services, economic factors, increased reinsurance premiums, and other factors continue to contribute to the operating results in 2006.

The open competition system in Illinois allows insurers to succeed and allows consumers to purchase insurance at a reasonable price. Successful insurers will likely be those that are customer-oriented, pay attention to the demands of the technological age, have a contingency plan, and use common sense in underwriting, expansion, and management policies. The Division does not make recommendations for regulatory changes in this Report. The Division will continue to identify problems and vigilantly monitor the insurance marketplace, reporting and making recommendations as necessary.

**APPENDIX C – Consolidated Statement of Income for Illinois-licensed
Property/Casualty Insurers for the year ending December 31, 2006**

UNDERWRITING INCOME		Current Year	Prior Year
1	Premiums earned	\$359,331,626,724	\$342,046,052,879
2	Losses incurred	191,391,031,253	211,464,390,281
3	Loss expenses incurred	42,949,684,867	45,182,345,605
4	Other underwriting expenses incurred	96,724,207,417	90,078,280,207
5	Aggregate write-ins for underwriting deductions	92,439,321	607,058,921
6	Total underwriting deductions	331,157,362,854	347,332,075,020
7	Net income of protected cells	-	-
8	Net underwriting gain (loss)	28,174,263,868	(5,286,022,151)
INVESTMENT INCOME			
9	Net investment income earned	51,033,395,295	44,738,173,473
10	Net realized capital gains (losses) less capital gains tax of \$(1)	2,401,087,220	8,559,446,745
11	Net investment gain (loss)	53,434,482,511	53,297,620,213
OTHER INCOME			
12	Net gain (loss) from agents' or premium balances charged off (amount recovered \$(1) amount charged off \$(2))	(994,425,751)	(1,275,680,316)
13	Finance and service charges not included in premiums	1,911,813,826	1,828,569,450
14	Aggregate write-ins for miscellaneous income	(498,461,372)	(552,249,742)
15	Total other income	418,926,691	639,384
16	Net income before dividends to policyholders, after capital gains tax and before all other federal and foreign income taxes	82,027,673,061	48,012,237,451
17	Dividends to policyholders	2,540,039,606	1,040,313,811
18	Net income, after dividends to policyholders, after capital gains tax and before all other federal and foreign income taxes	79,487,633,464	46,971,923,637
19	Federal and foreign income taxes incurred	18,188,098,492	7,707,052,750
20	Net income	61,299,534,973	39,264,870,891
CAPITAL and SURPLUS ACCOUNT			
21	Surplus as regards policyholders, December 31 prior year	436,577,197,283	398,865,438,173
22	Net income	61,299,534,973	39,264,870,891
23	Net transfers (to) from protected cell accounts	-	77,371
24	Change in net unrealized capital gains or (losses) less capital gains tax of \$(1)	28,677,652,352	3,252,136,350
25	Change in net unrealized foreign exchange capital gain (loss)	91,905,938	(261,165,495)
26	Change in net deferred income tax	214,115,692	48,174,570
27	Change in nonadmitted assets	(1,326,329,717)	(585,612,867)
28	Change in provision for reinsurance	350,216,679	285,364,177
29	Change in surplus notes	(305,474,510)	336,221,600
30	Surplus (contributed to) withdrawn from protected cells	-	-
31	Cumulative effect of changes in accounting principles	30,950,873	(906,478,814)
32.1	Capital changes paid in	51,789,111	27,834,970
32.2	Capital changes transferred from surplus (stock dividend)	5,940,806	4,616,970
32.3	Capital changes transferred to surplus	-	(1,176,467,600)
33.1	Surplus adjustments paid in	807,023,189	13,448,528,520
33.2	Surplus adjustments transferred to capital (stock dividend)	(5,634,286)	(7,687,084)
33.3	Surplus adjustments transferred from capital	(3,600,000)	1,116,764,160
34	Net remittances from or (to) home office	(74,637,449)	(41,162,431)
35	Dividends to stockholders	(27,549,143,250)	(15,225,109,597)
36	Change in treasury stock	598,591,736	20,854,285
37	Aggregate write-ins for gains and losses in surplus	(1,032,030,083)	(1,890,000,872)
38	Change in surplus as regards policyholders for the year	61,830,872,048	37,711,759,114
39	Surplus as regards policyholders, December 31 current year	\$498,408,069,329	\$436,577,197,277
